

SOPHOS

CASE STUDY

Coursera is an education platform that partners with top colleges, like Stanford University, and organizations worldwide to offer free online courses, available to anyone. Coursera envisions a future where everyone has access to an excellent education. The company aims to empower people with courses that will improve people's lives, the lives of their families, and the communities in which they live. Based in Mountain View, California, Coursera has more than 120 employees and serves over 10 million users with 839 courses, offered by 114 institutions.

Sophos Solutions
Sophos Cloud

“Sophos Cloud has proven to be a highly effective, yet easy-to-manage and cost-effective solution for securing our Mac environment.”

VU TRUONG
IT Manager, Coursera

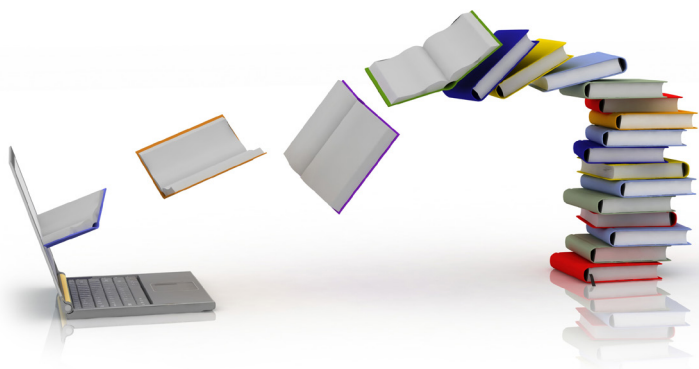

Challenge

As a smaller and rapidly growing organization, Coursera knew it was imperative to provide effective security for its 160 endpoints in a cost-effective and scalable manner. With the help of partner Total Tech, Coursera required a solution that could support its Mac-dominant environment, which has typically been under-served by security vendors. With Vu Truong being the sole IT manager to support the entire organization, Coursera needed a security solution that could be easily managed and maintained.

Solution: Sophos Cloud

After researching a range of cloud and on-premise security solutions, Truong and Coursera found Sophos Cloud to be the perfect fit. Compared to competing cloud solutions, Sophos offers the Coursera enterprise-class security in a lighter, faster, and more nimble application.

Without having to incur capital expenses for in-house hardware and software, Coursera was able to deploy the solution rapidly and easily. Most importantly, Coursera’s users found their work days to be business as usual. “For me, Sophos Cloud was easy to manage. And, it was easy on our users,” describes Truong. The single console within Sophos Cloud simplifies management of the entire environment, ensuring that all of Coursera’s endpoints are comprehensively protected.
