

# SECURE AUTHENTICATION

ENJOY SAFER TECHNOLOGY®

## SECURE AUTHENTICATION

ESET Secure Authentication is a mobile-based, two-factor authentication system that adds an extra layer of security to company networks and data.

The solution consists of the server side and the client side—the latter comes in the form of a mobile app. The option to generate OTPs is not limited to the mobile app only—SMS messages or existing hardware tokens can also be used.

## Ultra-strong authentication to protect network access and assets

You can use ESET Secure Authentication for:

- Accessing your company's VPN
- Remote Desktop Protocol
- Additional authentication for desktop login (signing in to an operating system)
- Web/cloud services via Microsoft ADFS 3.0, such as Office 365 and Google Apps
- Various Microsoft Web Apps, such as Outlook Web Access (OWA)
- Exchange Control Panel 2010 & Exchange Administrator Center 2013
- VMware Horizon View
- RADIUS-based services

ESET Secure Authentication also comes with an API to integrate it with your existing Active Directory-based authentication, as well as with an SDK that easily implements into any proprietary system.

### Business benefits

- Helps prevent the risk of breaches with unique passwords for each access
- Protects from poor password practices
- Flexibility to define your own OTP delivery channel (e.g. your own SMS gateway)
- Saves costs—no additional hardware needed
- Easy to migrate to and use
- Supports existing hardware tokens to meet compliance requirements
- Also adds 2FA to your cloud applications, such as Office 365 or Google app

### IT benefits

- API/SDK for easy integration into proprietary software and business tools
- App works without internet connection (once downloaded)
- Works with a broad range of VPN appliances
- Supports most types of mobile operating systems
- Global technical support in local languages
- Out-of-the-box solution
- Increases productivity and reduces unnecessary friction when accessing trusted sites, thanks to IP Whitelisting
- Tools for deployment and configuration in large user environment

## Datasheet

---

<b>Two-factor Authentication</b>	<p>Mobile-based, two-factor (2FA) one-time password (OTP) authentication for a higher level of security</p> <p>Native support for a broad range of platforms (see Supported platforms overview)</p> <p>Software only solution – no need to carry additional device or token</p> <p>Convenient for the mobile workforce</p> <p>Support for hardware tokens</p>
<b>Client Side (mobile app)</b>	<p>One-tap installation, simple and effective user interface</p> <p>Delivery of OTP via client application, SMS or hardware token</p> <p>OTP generation works independently of an available internet connection</p> <p>Compatible with any mobile phone supporting SMS messaging</p> <p>Supports a broad range of mobile operating systems</p> <p>PIN-protected access to prevent fraud in case of device theft or loss</p> <p>Serves multiple OTP zones, e.g. OWA access, VPN access, and others</p> <p>Apps available in these languages: English, German, Russian, French, Spanish, Slovak</p>
<b>Server Side</b>	<p>Out-of-the-box solution</p> <p>Easy double-click installation and setup</p> <p>Installer automatically recognizes OS and selects all suitable components</p> <p>Interactive installer, drop-in installation into ADFS</p>
<b>Custom Integration Options</b>	<p>In Active Directory environment, use either ESET Secure Authentication API or User Management API for easy integration into proprietary systems</p> <p>SDK allows for implementation for non-Active Directory users</p>
<b>Remote Management</b>	<p>Supports Microsoft Management Console (MMC)</p> <p>Active Directory integration</p> <p>ESET Secure Authentication extends Active Directory Users &amp; Computers (ADUC plugin) with additional features to enable managing the users' two-factor authentication settings</p>

## Supported platforms overview

<b>Remote Login Platforms</b>	<b>Remote Desktop Protocol</b>	
	<b>VPN Protection:</b> Barracuda, Cisco ASA, Citrix Access Gateway, Citrix NetScaler, Check Point Software, Cyberoam, F5 FirePass, Fortinet FortiGate, Juniper, Palo Alto, SonicWall	
<b>Local Login Protection (Windows)</b>	Windows 7 and later	Windows Server 2008 R2 and later
<b>Active Directory Federation Services</b>	Microsoft ADFS 3.0 (Windows Server 2012 R2)	
<b>Supported VDI Platforms</b>	VMware Horizon View	Citrix XenApp
<b>Microsoft Web Applications</b>	Microsoft Web Applications Outlook Web Access Microsoft Exchange 2010 Outlook Web App Exchange Control Panel Microsoft Exchange 2013 Outlook Web App Exchange Admin Center	Microsoft Dynamics CRM 2011, 2013, 2015 Microsoft SharePoint 2010, 2013 Microsoft Remote Desktop Web Access Microsoft Terminal Services Web Access Microsoft Remote Web Access
<b>Custom Integration</b>	ESET Secure Authentication easily integrates with your RADIUS-based services, as well as via the ESET Secure Authentication API or the User Management API to your existing Active Directory-based authentication. Non Active Directory customers with custom systems can use the easy-to-deploy SDK.	
<b>Operating Systems (Server Side)</b>	Windows Server 2003(32&64bit), 2003 R2 (32&64bit), 2008 (32&64bit), 2008 R2, 2012, 2012 R2 Windows Small Business Server 2008, 2011 Windows Server 2012 Essentials, 2012 R2 Essentials Management tools are also supported on client operating systems from Windows XP SP3 onwards, in both 32-bit and 64-bit versions.	
<b>Mobile Phone Operating Systems (Client Side App)</b>	iOS 4.3 or higher (iPhone) Android 2.1 or higher Windows Phone 7 or newer Windows Mobile 6	BlackBerry 4.3 to 7.1 and 10 and higher Symbian - all supporting J2ME All J2ME enabled phones
